

ABB tacteo® KNX

The individual touch

- Capacitive KNX glass sensor
- Individually configurable as desired
- Extremely flat design
- Secure access control for the hotel and hospitality industry

ABB tacteo® KNX is a freely configurable KNX sensor for intelligent building control in high-end hotels, residential buildings, offices and public buildings.

Intelligent control that adapts
to your individual needs.

The ABB tacteo® KNX sensor is a capacitive control element for the intelligent building automation of high-end luxury hotels, offices and public and residential buildings.

ABB tacteo® KNX meets all the requirements that a modern design demands – the highest levels of quality and above all comfort: from blinds, lighting and heating to media and access, everything is easy to control.

Are you an architect planning a building with maximum functionality and a personal touch? Do you desire a modern home that is as individual as you are? Design your KNX sensor with the ABB tacteo® configurator, completely as you like. The number of functions is variable and can be determined according to your specific needs and wishes. Individually configured as required, each sensor is unique in design and function.

Symbols for
every occasion
and every taste.

A smart sensor for everything

Advantages for you at a glance

—
The extra-flat KNX sensor fits
into any environment

Flat and theft-proof

The frameless and extra-flat KNX sensor with a diameter of 9.5 mm sits almost flush with the wall and blends harmoniously into any wall design. Peace of mind is provided by the optional removal guard, which protects the KNX sensor from theft.

Secure access control for the hospitality industry

Hotel access control

The ABB tacteo® KNX range offers secure access control for the hospitality industry. It is particularly practical that the sensor performs all of a hotel's management tasks, which can be controlled from a central point such as the reception desk.

The capacitive glass sensors react without contact

Intuitive operation

The capacitive KNX glass sensors react without any touch or contact. When moving your hand towards the sensor, the status lighting switches on automatically. On the other hand, touching the sensor with the entire palm of your hand triggers a preprogrammed function – such as “switching on the light”. With a tap of the finger the desired function can be activated. Easy operation is also ensured by the tried-and-tested colour control concept.

Unique in design and function

Configure your sensor exactly as you want it

Design your own individual KNX sensor with the ABB tacteo® configurator

Configurator

You can just have a look without logging in – you only need an account if you want to make a purchase. The configurator can be found in the MyBuildings portal powered by ABB Ability or directly at: tacteo-configurator.my.abb-livingspace.com

Configure your sensors

Here you have the opportunity to configure your sensor just as you like it. If you need some support at this stage, check out the “This is how it works” section which will help you.

—
Save your sensor and get
your unique design ID

Once you have finished configuring
your sensor, save it and attach it to
a project. An individual design ID
will then be generated.

—
Add the sensor to
the parts list

Once you have configured all sensors
belonging to a project, go to the project
and add the sensors to your list of
parts. The parts list can be published in
Excel or PDF format or printed immedi-
ately. It contains all important informa-
tion: most importantly, your design ID.

—
Forward the list
to your wholesaler

Take or send the parts list to your
wholesaler. You don't need to do
anything else.

—
Which functions do you
need? Make a selection
with our configurator.

Product overview

Elements and device sizes

Devices, symbols and descriptions for every occasion.

Here you will find all control elements that can serve as the basis for your configuration. Select the appropriate sensor in the configurator and add symbols and descriptions according to your requirements.

Colour options

Black glass

White glass

A typical configuration example for a sensor in a hotel application.

Unlimited possibilities – all texts, colours and icons for a variety of different functions can be freely edited using the ABB tacteo® configurator.

One symbol control panel

— Available sizes of the control panel with one integrated function.

86 × 86
TB/U1.1.1-CG

115 × 86
TB/U1.2.1-CG

86 × 115
TB/U1.3.1-CG

Two symbol control panel

— Available sizes of the control panel with up to two integrated functions.

86 × 86
TB/U2.4.1-CG

86 × 86
TB/U2.5.1-CG

86 × 115
TB/U2.7.1-CG

115 × 86
TB/U2.8.1-CG

Four symbol control panel

— Available sizes of the control panel with up to four integrated functions.

86 × 86
TB/U4.4.1-CG

86 × 86
TB/U4.5.1-CG

86 × 115
TB/U4.7.1-CG

115 × 86
TB/U4.8.1-CG

Six symbol control panel

— Available sizes of the control panel with up to six functions.

86 × 86
TB/U6.4.1-CG

86 × 86
TB/U6.5.1-CG

86 × 115
TB/U6.7.1-CG

115 × 86
TB/U6.8.1-CG

Twelve symbol control panel

— Available sizes of the control panel with up to twelve functions.

86 × 157
TB/U12.7.1-CG

157 × 86
TB/U12.8.1-CG

Four symbol control panel with room temperature control

— In addition to the four symbols for room temperature control, an additional four functions can also be integrated.

86 × 157
TBR/U4.7.1-CG

157 × 86
TBR/U4.8.1-CG

Room temperature control

—
In addition to the fixed control buttons plus and minus, two functions can additionally be selected from the room temperature control category.

86 × 86
TR/U.1.1-CG

86 × 115
TR/U.2.1-CG

115 × 86
